[Welcoming Young Children Into the Museum: A Practical Guide](#) Aug 01 2022 Welcoming Young Children into the Museum provides all of the information practitioners need to consider when making the decision to engage with this audience and their carers. Meeting the reader where they are, this guide enables professionals to work towards outcomes that fit with their needs. Working methodically from the initial stages of bringing staff on board, through to implementation and evaluation, readers are carefully steered through each phase. Big-picture needs, like adherence to mission, are considered alongside logistical components, like cleaning schedules, to ensure that museums cater to young children in a way that is beneficial to both the visitors and the institution. Drawing on current neurological research and best practices in early childhood education and development, this guide presents case studies from a variety of different institutions around the world that demonstrate that creating interesting, developmentally appropriate opportunities for young children is about much more than just simplifying what is already on offer. Erdman, Nguyen and Middleton demonstrate that the age and needs of the visitors must be taken into careful consideration, as well as the assets and potential obstacles of the institution. Welcoming Young Children into the Museum will be essential reading for professionals working in museums large and small, regardless of type. It will be useful to those who are considering setting up new programmes for early years audiences and those with existing programmes, who would like to improve their offering.

[Children Draw](#) Aug 21 2021 Children Draw is a concise, richly illustrated book, aimed at parents, teachers, and caretakers, that explores why children draw and the meaning and value of drawing for youngsters—from toddlers aged two to pre-adolescents aged twelve. Informed by psychology and practical teaching with children, it guides readers through the progressive stages and characteristics of drawing development as children grow and change mentally, physically, socially, emotionally, and creatively. It offers parents tips about encouraging children to express their ideas visually, age-appropriate art materials, workspaces, and different media, as well as suggestions for making an art museum visit more meaningful—not to mention more fun—for both parents and kids. Packed with many delightful examples of children's art, Children Draw is an essential book for parents interested in their child's art activities.

[How and Why to Read and Create Children's Digital Books](#) Apr 16 2021 How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

[Developing Children as Researchers](#) Jan 14 2021 Encouraging young children to create and carry out their own social research projects can have significant social and educational benefits. In addition, their research may help them to influence local and national policies and practices on issues that matter to them. To support this, Developing Children as Researchers acts as a practical guide to give teachers – and other adults who work with children – a set of structured, easy-to-follow session plans that will help children to become researchers in their own right. Comprising of ten session plans that have already been tried and tested in schools, this guide will assist you in supporting child researchers while helping you to develop the techniques for teaching research skills effectively. The session plans also ensure that children's views are heard and reflected by encouraging their active curiosity and investigation of issues that they may be concerned about. Forming a step-by-step guide, the ten sessions cover themes such as: starting the research process and identifying a research topic; the three key principles of research: be sceptical, systematic and ethical; choosing research participants and drawing up a research plan; the range of data collection and analysis methods; reporting the results of, and reflecting upon, a research project. Children's research has often depended upon the support of academic researchers to provide resources and training. By making the research training and facilitation process more widely accessible, this guide will help remove the psychological and practical hurdles that teachers and others who regularly work with children might feel about helping children's research themselves.

*Planning in the Moment with Young Children* Oct 30 2019 Young children live in the here and now. If adults are to make a real difference to their learning they need to seize the moments when children first show curiosity, and support their next steps immediately. This book embraces the concept of planning "in the moment" and emphasises the critical role of the adult in promoting child-led learning, giving early years practitioners the confidence and insight to work and plan in the moment, and enabling the children in their care to live, learn, play and develop in the here and now. *Planning in the Moment with Young Children* maintains a strong link to practice, providing numerous examples of how practitioners can integrate spontaneous planning and rich adult-child interactions into their everyday practice and early years curricula. From timetabling to setting clear rules, creating enabling environments, keeping records and making use of a variety of materials, the book demonstrates the multitude of ways in which practitioners can encourage child autonomy and respond to the unique needs of each child. Examples from practice are rooted in theory, fully contextualised, and exemplified by original documentation sourced from the author's own experiences and from a wide variety of settings. Key features include: over 180 full colour photographs to illustrate practice; photocopiable pages including planning sheets, documentation and activity sheets; advice on working with parents, individual children and groups; tailored guidance on working with children at different

stages of development from birth to age 6 years; relevance to a range of settings, including childminders, pre-schools, nurseries and schools. When children are allowed to select where, with what, and how to play, they are truly invested in their play, they become deeply involved and make dramatic progress. This book is an outstanding testament to a responsive and child-led way of working in early years environments. Practitioners will be guided, inspired and supported to work spontaneously and reactively – planning as they go and celebrating the results!
