Wide Area Surveillance Feb 18 2022 The book describes a system for visual surveillance using intelligent cameras. The camera uses robust techniques for detecting and tracking moving objects. The real time capture of the objects is then stored in the database. The tracking data stored in the database is analysed to study the camera view, detect and track objects, and study object behavior. These set of models provide a robust framework for coordinating the tracking of objects between overlapping and non-overlapping cameras, and recording the activity of objects detected by the system.

Active Perception Oct 02 2020 This book defines the emerging field of Active Perception which calls for studying perception coupled with action. It is devoted to technical problems related to the design and analysis of intelligent systems possessing perception such as the existing biological organisms and the "seeing" machines of the future. Since the appearance of the first technical results on active vision, researchers began to realize that perception -- and intelligence in general -- is not transcendental and disembodied. It is becoming clear that in the effort to build intelligent visual systems, consideration must

be given to the fact that perception is intimately related to the physiology of the perceiver and the tasks that it performs. This viewpoint -- known as Purposeful, Qualitative, or Animate Vision -- is the natural evolution of the principles of Active Vision. The seven chapters in this volume present various aspects of active perception, ranging from general principles and methodological matters to technical issues related to navigation, manipulation, recognition, learning, planning, reasoning, and topics related to the neurophysiology of intelligent systems.

Lovers of Ruth Dec 04 2020 This book is written to show that life was not a lot different during this time that it was written and today. Ruth had two husbands, which a lot of people did not know about. Very little is mentioned about her husbands in the Bible. It really is two love stories in one. First as a young woman in the land of Moab she marries a Jewish boy by the name of Mahlon. Then she comes to Israel with her mother-in-law, Naomi after all the men have passed on. There she meets a man twice her age and marries him. He is Boaz. This is a must read part of the book but only after you read all of the book. That is also the way I taught the Bible, read and understand the Old Testament before going on to the New Testament. You will be surprised at the ending if you have never read this book of the Bible.
