Katie's Cabbage Dec 03 2020 Katie's Cabbage is the inspirational true story of how Katie Stagliano, a third grader from Summerville, South Carolina, grew a forty-pound cabbage in her backyard and donated it to help feed 275 people at a local soup kitchen. In her own words, Katie shares the story of the little cabbage seedling and the big ideas of generosity and service that motivated her to turn this experience into Katie's Krops, a national youth movement aimed at ending hunger one vegetable garden at a time. Katie's Cabbage reminds us of how small things can grow and thrive when nurtured with tender loving and care and of how one person, with the support of family, friends, and community, can help make a powerful difference in the lives of so many. Katie's Cabbage was illustrated by Karen Heid, associate professor of art education at the University of South Carolina School of Visual Art and Design. Editorial assistance was provided by Michelle H. Martin, a dedicated gardener and the Augusta Baker Chair in Childhood Literacy at the University of South Carolina School of Library and Information Science. Patricia Moore-Pastides, First Lady of the University of South Carolina and author of *Greek Revival from the Garden: Growing and Cooking for Life*, offers a foreword about her friendship with Katie and her admiration of Katie's dream to end hunger one garden at a time.

Staten Island Noir Feb 23 2020 "In a thrilling tilt-a-whirl of crime and drama . . . Smith has carefully chosen writers concerned with the true nature of the small suburban borough." —Electric Literature Staten Island may be New York City's forgotten borough, but it ranks high up on the list of places known for organized crime. If that wasn't enough to boost its noir reputation, there are its haunted mansion, hate crimes, and Crowsey urban legend. Dark deeds will always find a home on this side of the Verrazano bridge, and they give Staten Island a character all its own. *Staten Island Noir* includes editor Patricia Smith's Robert L. Fish Memorial Award-winning short story, "When They Are Done with Us," which was also selected for inclusion in *The Best American Mystery Stories 2013*. You'll find more tales by Bill Loehfelm, S.J. Rozan, Ted Anthony, Todd Craig, Ashley Dawson, Bruce DeSilva, Louisa Ermelino, Binnie Kirshenbaum, Michael Largo, Mike Penncavage, Linda Nieves-

Powell, Shay Youngblood, and Eddie Joyce. “It’s not enough for noir to be dark. It’s got to be bad-ass. Its words, its decaying and horrible beauty have got to hit you like a spiked heel dragged from your guts to your gullet. It’s got to twist the hot knife of passion in that soft space right below your belly while pumping bullets into your heart. It’s got to make you bleed . . . Staten Island Noir features some dusky and drop-dead gorgeous gems (emphasis on the dead) that do just that.” —Grub Street Daily “[An] exceptionally strong anthology.” —Publishers Weekly, starred review

The Book of L Feb 17 2022 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The Fama Portfolio Sep 12 2021 Few scholars have been as influential in finance, both as an academic field and an industry, as Eugene Fama. Since writing his groundbreaking 1970 essay on efficient capital markets, Fama has written over 100 papers and books that have been cited hundreds of thousands of times. Yet there is no one collection where one can easily find his best work in all fields. "The Fama Portfolio" will be an outstanding and unprecedented resource in a field that still concentrates mainly on questions stemming from Fama's work: Is the finance industry too large or too small? Why do people continue to pay active managers so much? What accounts for the monstrous amount of trading? Do high-speed traders help or hurt? The ideas, facts, and empirical methods in Fama's work continue to guide these investigations. "The Fama Portfolio" will be a historic and long-lasting collection of some of the finest work ever produced in finance."

Medical Anthropology Mar 06 2021 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are

nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.
