the feedback received from our valuable students and readers. It is exclusively prepared for the students who wish to appear for campus recruitment screening test and graduate/post graduate students appearing for various competitive examinations in Quantitative Aptitude and Reasoning. The main objective of this volume is to guide the students to solve the problems within the stipulated time and that too with the higher degree of accuracy. Organized in two parts—Quantitative Aptitude (Part I) and Reasoning (Part II)—it helps students to apply basic mathematical and reasoning concepts to a range of quantitative and reasoning problems. The separate sections are devoted to verbal and nonverbal reasoning. It sharpens the ability to apply analytical and logical thinking while gathering and analysing information, designing and testing solutions to problems, and formulating plans. This book is a valuable resource for conducting training

*Substance Abuse and Aftercare*  
Nov 08 2020 Drug and alcohol addiction are critical social problems in the United States. Drug and alcohol abuse are powerful facilitators of health and economic disparities, making recovery and re-entry into the community difficult. Alcohol and drug abuse/addiction are among the costliest of health problems, totaling approximately \$428 billion annually. A range of services have been developed to address the problem of substance dependence, including inpatient services, outpatient services, and recovery housing. However, only about 11% of those with substance addictions reach any type of substance abuse

treatment, and those that are treated evidence high rates of relapse. Thus, it is critical to understand the mechanisms by which individuals are successful, and sustain abstinence after receiving treatment and aftercare. This book provides a collection of research that explores alternative models, aftercare programs, employment services, trauma issues that affect recovery, gender-specific, and culturally modified treatment and aftercare programs. Each chapter is an individual study that addresses key unanswered questions in substance abuse and recovery research. Furthermore, the editors and authors identify potentially important, understudied topics for further research and formulate public policy recommendations. This is a must read for addiction researchers, academics, students, and individuals interested in learning about the dangers of substance abuse.

logic are technically sound, though it is still your responsibility to build services that actually add value to your business. SOA with REST is the first comprehensive tutorial and reference for designing and building RESTful services as part of service-oriented solutions and in conjunction with service-oriented architecture (SOA). This book demonstrates that REST is not only a suitable medium for building truly service-oriented solutions, but also that the service-oriented architectural model is a necessary foundation for REST technology architectures to realize their full business potential. The authors provide thorough mapping of REST constraints and architectural goals with service-orientation principles and SOA characteristics. Using real-world examples, they show how to leverage REST's simplicity, flexibility, and low overhead without compromising the power or manageability of service-oriented solutions and architectures. and in some cases through the excretion of toxins with their saliva, the main relevance of ticks lies in the wide variety of pathogens that they can transmit, including viruses, bacteria, protozoa and helminths. Owing to socioeconomic and environmental changes, tick distribution is changing with incursions of ticks and tick-borne diseases occurring in different regions of the world when the widespread deployment of chemical acaricides and repellents has led to the selection of resistance in multiple populations of ticks. New approaches that are environmentally sustainable and that provide broad protection against current and future tick-borne pathogen (TBP) are thus urgently needed. Such development, however, requires improved understanding of factors resulting in vector competence and tick-host-pathogen interactions. **Pasteurellaceae** Dec 30 2019 Pasteurellaceae comprise a large and diverse family of Gram-negative bacteria, with members ranging from important pathogens such as *Haemophilus influenzae* to commensals of the animal and human mucosa. Information on the biology of these organisms has mushroomed in recent years, driven by the development of novel genetic and molecular methodologies. Since 1995, the family has been expanded from three genera to the current thirteen through the use of new genetic-based classification and identification technologies. Many members of the Pasteurellaceae family make excellent natural models for the study of bacterial pathogenesis and host-pathogen-interactions thus giving valuable insights into related human diseases. Research in this area is at a very exciting stage. In this timely book, leading international Pasteurellaceae

The third edition has been extensively revised and updated to include many new sections and over 50 new or redrawn illustrations. There are now over 220 illustrations, many incorporating a second colour to highlight essential features. The format has been changed to enhance the visual attractiveness of the book. The tripartite organization of the first and second editions has been modified by combining the purely descriptive or factual aspects of fault and fold structure in the earlier chapters with a simple treatment of mechanisms, leaving the more geometrically complex treatment until after the relevant sections on stress and strain, as before. Some subjects are introduced for the first time, e.g. inversion and orogen collapse, and others have been extensively modified, e.g. the chapter on gravity controlled structures now emphasises modern work on salt tectonics. The last third of the book is devoted to the wider context of geological structures and how they relate

Over the last several decades, research has clearly shown that rehabilitation efforts can be effective at reducing recidivism among criminal offenders. However, researchers also recognize that treatment is not a "one size fits all" approach. Offenders vary by gender, age, crime type, and/or addictions, to name but a few, and these individual needs must be addressed by providers. Finally, issues such as leadership, quality of staff, and evaluation efforts affect the quality and delivery of treatment services. This book synthesizes the vast research for the student interested in correctional rehabilitation as well as for the practitioner working with offenders. While other texts have addressed issues regarding treatment in corrections, this text is unique in that it not only discusses the research on "what works" but also addresses implementation issues as practitioners move from theory to practice, as well as the importance of staff, leadership and evaluation efforts.

art of writing, *The Well-Crafted Sentence* zeroes in on the building block of great prose: the sentence. With a friendly, approachable, and elegant tone, Nora Bacon shows the benefits of attention to style and offers a range of revision strategies that give students the tools to strengthen and develop their writing. Giving students the opportunity to see successful rhetorical choices at work in writing they admire, the text includes a brief anthology of readings by ten accomplished stylists, five of them new to this edition. Examples throughout the text are drawn from these model pieces, as are integrated exercises that help students apply concepts to their own writing. Additionally, a new first chapter, *Approaches to Style*, introduces students to the concept of style.
